DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 12/26/00 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-15 and 31-57 are rejected under 35 U.S.C. 102(e) as being anticipated by Birch et al. (US 6,461,058).

Birch et al. discloses a detail optical connector [figures 1-4c] comprising:

Art Unit: 2839

- a housing having a cavity disposed therein for connecting first and second optical connectors;
- an electromagnetic shield;
- a circuit board; and
- alignment members including pins and holes.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 16-30 is rejected under 35 U.S.C. 103(a) as being unpatentable over Birch et al. in view of Okugawa et al. (US 5,163,109).

Birch et al. discloses the instant claimed invention as described above except for an elastomeric member proximate to the housing.

Okugawa et al. discloses an optical connector comprising an elastomeric member proximately positioned to a housing [figure 10].

It would have been obvious to one having ordinary skill in the art at the time invention was made to modify the housing of Birch et al. to provide the elastomeric member as taught by Okugawa et al. in order to reduce the contact pressure.
